Career Summary

A software engineer whose career goal is to continue growing as a developer and work on a team that follows an established product lifecycle process. Currently work on a team following Agile practices to build and maintain web services for the company's business-to-business brands, and also work with a variety of clients on contract work for a web consulting company. Ideally my next position would allow me to develop my current skills, to increase my IT knowledge base, and to apply my creative background. Previously completed a B.A. in English and two internships with a publishing company.

Experience

Informa (previously Penton)

April 2015 – Present

Software Engineer

Overland Park, KS

- Build and maintain data APIs that serve real-time data in subscription web services using Java for backend with a PostgreSQL database and Node.js / Ember for front end; customize the APIs to deliver each brand's data requirements; deploy using AWS
- Maintain other websites and services such as the Employee Handbook
- Implement JUnit and JMeter tests; perform manual testing after deployment

Unity Data Systems

Dec 2015 – Present

Web Developer

Gardner, KS

- Build websites primarily using C#, SQL database, HTML, CSS, and JS in a DNN Framework
- All sites have cross-browser compatibility and responsive design
- Built apps for both Android and iOS platforms using Xamarin
- Currently converting an HTML5 template built with Webflow into a WordPress theme to host the blog content on Unity Data's website
- Provide maintenance and updating services

Informa (previously Penton)

July 2012 – April 2015

Quality Assurance Analyst

Overland Park, KS

- Performed manual, automated, and regression testing in dev, staging, and production environments for business-to-business brands' websites hosted on a custom Drupal 6 platform
- Testing process followed Agile practices in 3-week sprint cycles using Gemini ticketing system to track tasks and report bugs
- Investigated issues reported by editorial and digital group staff

First Class Flyer

March 2012 – Dec 2013

Web Content

Monterey, CA

- Migrated content from First Class Flyer legacy website into new site using Adobe CQ5 Web Content Management System
- Converted monthly PDF newsletter content into web pages

American Academy of Family Physicians

May 2011 – May 2013

Web Content Temp

Leawood, KS

- Hired for the conversion of AAFP and FamilyDoctor.org legacy websites into new sites using Adobe CQ5 Web Content Management System
- Migrated and formatted content from Word documents, PDFs, and legacy website into new web pages, tables, or the Digital Asset Management folder; tracked editing notes and issues in Excel spreadsheet; set up internal and external links; tagged pages for SEO
